**TISUK's own assessment tool Free to Fly** combines the models of TISUK, based on over 1,000 pieces of published research, into a powerful assessment and development tool that underpins accurate assessment combined with rich guidance on application, school / setting wide processes and ways to be. It is multifaceted, supporting well informed responses to identified needs, as well as compiling a profile of targeted responses and measures of the impact of interventions, drawing on a range of evidence and tools.
